

Press Release

REGULAR BROADCASTING BEGAN DECEMBER 21

For Immediate Release

23 December 2002

POC: George McClintock (615) 255-1300

WMQM, 1600-AM, Memphis, Tennessee's newest Christian Radio station has arrived. Several unforeseen delays have finally been overcome and the station began 50,000 Watt "on-air" testing on Saturday, 14 December 2002.

The station was temporarily off the air, due to interference caused to a local railroad crossing signal. The railroad crossing equipment was picking up our 50,000 Watt, 1600 kHz radio signal through the railroad track and causing the electronics to turn on the warning signals at the crossing. This problem was resolved and the station began regular programming on Saturday, December 21.

WMQM, 1600-AM, 50,000 Watts in Memphis, is the sister station to WWCR. World Wide Christian Radio serves Europe, Middle East and Africa on Shortwave from Nashville, Tennessee.
